Showing 1 - 15 of 17 Records | First | Previous | Next | Last

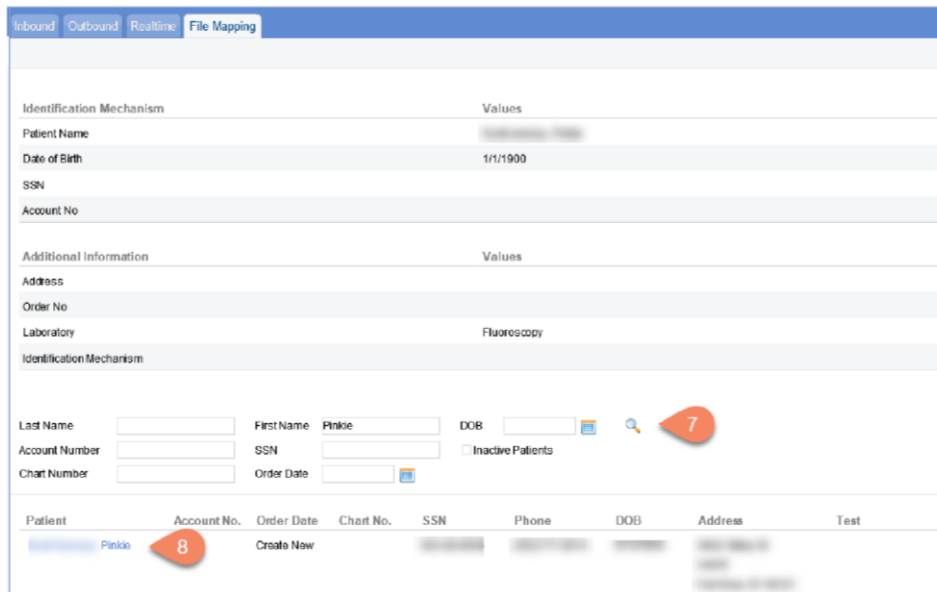

1. Click Personal (Home) module.
2. On the left-hand tree-menu: Expand "Administration"
3. Expand "Tracking"
4. Click "Message"
5. Click "Problem List"
6. Click on patient name (Blue hyperlink)

➤ Report any orders that cannot be clicked (No Hyperlink) (How to remove these is mentioned below)

Patient search TIP: You should be able to find all the patients for the day under "Today's Patients" list. Reconciliation with the list would make it easier to find the correct patient. Alternatively, appointment time and order time can also be checked as they should be within a few mins of each other.

Patient search TIP: Searching with full first name and the initial letter of the last name should cut down on search results. Especially if it's a common name like John etc.

CHECK PROBLEM LIST (FLUORO)

File Mapping

Identification Mechanism Values

Patient Name [Redacted]

Date of Birth 1/1/1900

SSN [Redacted]

Account No [Redacted]

Additional Information Values

Address [Redacted]
